Glossary

Term	Description
Abstraction	The removal of water from a source.
Aggregate	Rock that has been mined for the purpose of being a building material.
Agricultural Land Classification (ALC)	The system by which the physical quality of agricultural land is determined and graded on a scale of 1 to 5 with a subdivision of Grade 3 into the subgrades 3a and 3b.
Ancient woodland	An area of woodland that has been wooded continuously since 1600AD or earlier.
Arable	Land suitable for growing crops.
Area of Outstanding Natural Beauty (AONB)	Land protected by the Countryside and Rights of Way Act with the aim of protecting the land to conserve and enhance its natural beauty.
Aquifer	A body of rock that can hold groundwater.
Battery Energy Storage System (BESS)	Battery storage installation which will allow for the storage, importation and expiration of energy.
Best and Most Versatile (BMV)	Agricultural land that is defined as land that falls in ALC grades 1, 2 or 3a.
Buffer	Specified area or distance surrounding a site or feature of interest.
Cable route	The passage taken by the cables which connect the solar PV modules to the on-site substation and from the on-site substation to the existing national grid substation at Norton.
Carbon budget	In the context of the UK, a restriction on the amount of greenhouse gases that can be emitted over 5 years.
Catchment	An area where water drains to a common channel such as a river or lake.
Construction Environmental Management Plan (CEMP)	A site-specific plan that ensures that a site will mitigate its potential impacts on the environment during construction. It sets out and secures the measures, commitments and actions identified in the environmental statement.
Construction Traffic Management Plan (CTMP)	A site-specific plan that allows contractors to apply controls to the movement of pedestrians and vehicles.
Chartered Institute of Ecology and Environmental Management (CIEEM)	The professional body for ecologists and environmental managers, many of which are either Chartered Ecologists or Chartered Environmentalists.

Term	Description
Conservation area	An area designated under section 69 of the Planning (Listed Buildings and Conservation Areas) Act 1990 as being of special architectural or historic interest and with a character or appearance which is desirable to preserve or enhance.
Cumulative effects	The additional effects arising from changes caused by a development in conjunction with other past, present or reasonably foreseeable actions.
Decarbonisation	A reduction or removal of carbon dioxide output into the atmosphere.
Deciduous woodland	Woodland dominated by deciduous trees, these being trees which shed their leaves annually.
Decommissioning	To take out of use.
Decommissioning Environmental Management Plan (DEMP)	A site-specific plan that sets out the general principles to be followed in the decommissioning of a development and ensures that potential impacts on the environment during decommissioning will be mitigated.
Designated heritage asset	A World Heritage Site, Scheduled Monument, Listed Building, Protected Wreck Site, Registered Park and Garden, Registered Battlefield or Conservation Area designated under the relevant legislation.
Development Consent Order (DCO)	A legal instrument which grants consent to carry out a Nationally Significant Infrastructure Project. An application for development consent is made to the Planning Inspectorate, and the decision to grant the DCO is made by the Secretary of State.
Direct effect	An effect that is directly attributable to the development.
District level licence (DLL)	An approach whereby a developer can pay a sum to contribute towards the strategic conservation of great crested newts within a given area avoiding the need for survey and mitigation within a development.
Ecological Impact Assessment	The process of assessing the potential impacts on ecology arising from a development or project. This process is undertaken in accordance with guidelines produced by the Chartered Institute of Ecology and Environmental Management.
Embodied carbon	The amount of carbon emitted during the life-cycle of infrastructure or a building.
Environmental Impact Assessment (EIA)	An assessment of the impact of planned activities on the environment.
EIA Regulations	In the context of the Proposed Development, The Infrastructure Planning (Environmental Impact Assessment) Regulations 2017 which prescribe the

Term	Description
	information to be included in the Environmental Statement (ES) and the consultation to be carried out in connection with development requiring an ES.
Environmental Statement (ES)	A publicly available document which sets out the developer's own assessment of the likely environmental effects of the proposed development. It is prepared by the developer's independent consultants and submitted with the DCO application.
Environmentally Sensitive Areas (ESAs)	An agricultural area that contains wildlife or landscapes that would be threatened by unrestricted development. The scheme has now closed to new applicants.
Flood Risk Assessment (FRA)	An assessment of the risk of flooding for a development proposal.
Flood Zone 1	Areas deemed to be in flood zone 1 have been shown to be at less than 0.1% chance of flooding in any year, this is sometimes known as having a 1:1000 year chance.
Flood Zone 2	Areas deemed to be in flood zone 2 have been shown to have between 0.1% – 1% chance of flooding from rivers in any year (between 1:1000 and 1:100 chance) or between 0.1% – 0.5% chance of flooding from the sea in any year (between 1:1000 and 1:200 chance).
Flood Zone 3	Areas within flood zone 3 have been shown to be at a 1% or greater probability of flooding from rivers or 0.5% or greater probability of flooding from the sea.
Fluvial	Relating to a river.
Geomorphology	The study of the physical features of the surface of the earth.
Geophysical survey	The systematic collection of geophysical data for spatial studies. Geophysical surveys are archaeological methods that use ground-based physical sensing techniques to produce a detailed image or map of an area.
Groundwater	Water held underground in rock crevices or soil.
Habitat regulations	Also known as the Conservation of Habitats and Species Regulations 2017, the habitats regulations protect sites which are internationally important for threatened habitats and species and is a legal framework for species requiring strict protection.
Habitats Regulation Assessment (HRA)	A HRA is carried out to test if a plan or project proposal could significantly harm the designated features of a European site. You must consult the relevant Statutory Nature Conservation Body at the appropriate assessment stage of the HRA process.

Term	Description
Heavy Goods Vehicles (HGV)	A motor vehicle with a maximum allowed mass or gross combination mass of over 3,500 kilograms.
Heritage asset	A building, monument, site, place, area or landscape of historic value.
Historic England	Statutory body responsible for advising local and national government on matters relating to designated heritage assets.
Historic Environment Record (HER)	A record of known archaeological finds and features and historic buildings and historic /landscape features, relating to all periods from the earliest human activity to the present day; maintained by each County and Unitary Authority in the United Kingdom.
In-combination Climate Change Impact (ICCI) assessment	Identifies how the resilience of receptors in the surrounding environment are affected by the combined impact of future climate conditions and the Proposed Development.
In-combination effects	In-combination effects occur when separate impacts associated with the Proposed Development act on the same receptor, with the potential to lead to a significant effect.
Indirect effect	An effect that results indirectly from the proposed project as a consequence of the direct effect, often occurring away from the site, or as a result of a sequence of interrelationships or a complex pathway. They may be separated by distance or in time from the source of the effects.
Infiltration	The process by which surface water enters soil.
Invasive species	A non-native species that has been introduced into an area and becomes overpopulated and causes harm to the environment.
Inverter	Inverters convert the direct current (DC) electricity collected by the solar PV modules into alternating current (AC), which allows the electricity generated to be exported to the National Grid.
Key characteristics	Those combinations of elements which are particularly important to the current character of the landscape and help to give an area its particularly distinctive sense of place.
Landscape capacity	The amount of change which a particular landscape character type or area is able to accommodate without significant detrimental effects on its character. Capacity is likely to vary according to the type and nature of change proposed.
Landscape character	The distinct and recognisable pattern of elements in the landscape that makes one landscape different from another, rather than better or worse.

Term	Description
Landscape Character Areas (LCA)	These are single unique areas which are the discrete geographical areas of a particular landscape type.
Landscape character types	These are distinct types of landscape that are relatively homogeneous in character. They are generic in nature in that they may occur in different areas in different parts of the country, but wherever they occur, they share broadly similar combinations of geology, topography, drainage patterns, vegetation and historical land use and settlement pattern, and perceptual and aesthetic attributes.
Landscape fabric/elements	The individual features of the landscape, such as hills, valleys, woods, hedges, tree cover, vegetation, buildings and roads for example which can usually be described and quantified.
Landscape value	The importance attached to a landscape, often used as a basis for designation or recognition which expresses national or local authority consensus, because of its special qualities/attributes.
Landscape and Ecology Management Plan (LEMP)	A site-specific plan that sets out how the landscape and ecological measures will be implemented and maintained to ensure delivery of the mitigation or enhancement identified in the environmental statement.
Level of effect	Determined through the combination of sensitivity of the receptor and the proposed magnitude of change brought about by the development.
Listed Building	A building which is considered to be of special architectural or historic interest and listed in accordance with the Town and Country Planning (Listed Buildings and Conservation Areas) Act 1990.
Light Detection and Ranging (LiDAR)	Data gathered from aircraft which can provide highly detailed and accurate models of the land surface at metre and sub-metre resolution, including within woodland.
Local Plan	Prepared by the Local Planning Authority to define planning policy in the authority area and used to determine planning applications.
Local Wildlife Site (LWS)	Areas of land that are especially important for their wildlife. They are some of our most valuable wildlife areas. Local Wildlife Sites are identified and selected locally using scientifically determined criteria and surveys.
Magnitude (of effect)	A term that combines judgements about the size and scale of the effect, the extent of the area over which it occurs, whether it is reversible or irreversible and whether it is short or long term in duration.

Term	Description
Main River	A main river in the UK is a specific designation given to larger watercourses by the Environment Agency (EA). Typically, the more substantial rivers and streams within a catchment area. The critical factor that differentiates a main river from other watercourses is that the EA has direct responsibility for their maintenance, improvement, and construction.
Materials Management Plan (MMP)	A plan that allows for the reuse of soil and other materials.
Mineral Safeguarding Area (MSA)	An area designated by Minerals Planning Authorities which covers known deposits of minerals which are desired to be kept safeguarded from unnecessary sterilisation by non-mineral development.
Mitigation	Measures including any process, activity or design to avoid, reduce, remedy or compensate for adverse environmental impact or effects of a development.
National Park	Designation as a National Park means that the area has been identified as being of importance to the national heritage and as such is worthy of special protection and attention.
National Grid	The system operator of electricity and gas supply in Great Britain.
National Nature Reserve (NNR)	Areas designated by Natural England to protect important habitats, species, and geology.
National Planning Policy Framework (NPPF)	Sets out government planning policies and expectations for application in England.
National Policy Statement (NPS)	A national policy statement is a statutory document designated to set out national policy in relation to specific types of nationally significant infrastructure projects (NSIPs). Where an NPS is in effect for an NSIP development, it is the primary policy basis for determining a DCO application.
Nationally Significant Infrastructure Project (NSIP)	Large-scale infrastructure developments as defined by the Planning Act 2008. They require development consent via application made to, and determined by, the relevant Secretary of State.
Natura 2000 sites	A network of protected areas covering Europe's most valuable and threatened species and habitats. It is the largest coordinated network of protected areas in the world, extending across all 27 European Union countries.
Nature Improvement Areas (NIAs)	Established to create joined up ecological networks.
Net zero strategy	Plan to reduce emissions and decarbonise.
Order Limits	The land within which the Proposed Development can be carried out.

Term	Description
Ordinary Watercourse (OWC)	An "Ordinary Watercourse" is defined as a watercourse that does not form part of a "Main River".
Percolation	The movement of water through the soil.
Permissive Path	A Permissive Path is a route which the public can use because a landowner has made a route across their land available to the public (i.e. permitted the public to access otherwise private land). It is not nor should not become a public right of way.
Photomontage	A visualisation which superimposes an image of a proposed development upon a photograph or series of photographs.
Pollution and Spillage Response Plan	Outlines actions that should be taken to reduce pollution from an incident, including spillage.
Potable water	Water considered safe for consumption.
Preliminary Ecological Appraisal (PEA)	An initial ecological survey designed to identify the likely ecological constraints to development and scope the requirement for further detailed species or habitat specific surveys.
Preliminary Environmental Information Report (PEIR)	A report that provides information to the community and stakeholders and aids consultees in developing an informed view on the environmental impacts of a project.
Preliminary Risk Assessment (PRA)	A Preliminary Risk Assessment is a Phase I Desk Study which focuses on potential risks to human health, controlled waters and the wider environment. It can also be called a Phase I contamination survey and is often a pre-requisite for planning applications.
Priority habitat	Habitats deemed to be of principal importance for conserving biodiversity. Priority habitats are listed in the UK Biodiversity Action Plan.
Ramsar sites	Ramsar sites are wetlands of international importance that have been designated under the criteria of the Ramsar Convention on Wetlands for containing representative, rare or unique wetland types or for their importance in conserving biological diversity.
Receptor	A receptor is who or what will be, or can be, affected by pollution.
Registered Park and Garden	Parks and gardens of particular historic significance.
Residential visual amenity	A collective term describing the views and visual amenity from a residential property, relating to the type, nature, extent and quality of views that may be experienced from the property and its 'domestic curtilage' including gardens and access driveway. Residential Visual Amenity is only one

Term	Description
	component of the overall Residential Amenity, others being for example noise, shadow flicker and access amongst others.
Residual effects	Potential environmental effects remaining after mitigation.
Rochdale envelope	Allows flexibility for a development not yet fully designed. It involves assessing the maximum (and where relevant, minimum) parameters for the elements where flexibility is sought, recognising that the worst-case parameter for one technical assessment may differ from another.
Scheduled Monument	Nationally important historic sites, buildings or monuments identified by Historic England and designated by the Secretary of State for Culture, Media and Sport. Any work affecting a scheduled monument must gain consent from Historic England under the Ancient Monuments and Archaeological Areas Act (1979).
Scoping	Scoping determines a project's possible impacts and determines what an EIA will include.
Sense of place	The essential character and spirit of an area.
Sensitivity	A term applied to specific receptors, combining judgements of the susceptibility of the receptor to the specific type of change or development proposed and the value related to that receptor.
Setting	The surroundings in which a heritage asset is experienced.
Significant effects	It is a requirement of the EIA Regulations to determine the likely significant effects of development on the environment which should relate to the level of an effect and the type of effect. Where possible, significant effects should be mitigated. The significance of an effect gives an indication as to the degree of importance (based on the magnitude of the effect and sensitivity of the receptor) that should be attached to the impact described. Whether an effect should be considered significant is not absolute and requires the application of professional judgement.
Silt	Fine material such as clay or sand which is carried by running water and deposited as a sediment.
Site of Special Scientific Interest (SSSI)	A Site of Special Scientific Interest (SSSI) is a formal conservation designation. Usually, it describes an area that's of particular interest to science due to the rare species of fauna or flora it contains.
Site Waste Management Plan (SWMP)	A document which describes the amount and type of waste and how it will be disposed of.

Term	Description
Soil erosion	The wearing away of the upper layer of soil. Soil erosion can be caused by water, wind, ice etc.
Solar Photovoltaic (PV) modules	Solar PV modules, or 'solar panels, use sunlight as a source of energy to generate direct current electricity.
Source Protection Zone (SPZ)	An area that is protected as a source of drinking water determined by geo – hydrology and designed to protect groundwater aquifers from development or pollution.
Special Area of Conservation (SAC)	Special Areas of Conservation (SAC) are designated according to the Habitats Directive and are areas that require conservation measures to maintain ecological value.
Special Protection Area (SPA)	Special Protection Areas (SPAs) are protected areas for birds in the UK classified under: the Wildlife & Countryside Act 1981 (as amended) and the Conservation (Natural Habitats, & c.) Regulations 2010 (as amended) in England, Scotland and Wales.
Stakeholder	A person or group of people with a particular interest in a project.
Study area	The spatial area within which environmental effects are assessed (i.e. extending a distance from the scheme footprint in which significant environmental effects are anticipated to occur).
Substation	A set of equipment reducing the high voltage of electrical power transmission to that suitable for supply to consumers.
Sustainable Drainage System (SuDS)	SuDS are water management practices aiming to protect against water pollution, minimise flood risk and promote biodiversity.
Switchgear	Switchgears allow parts of the solar PV system to be de-energised safely.
Topography	The natural features of land.
Topsoil	The top layer of soil.
Tracking array	Tracking arrays adjust the position of the solar PV modules to track the sun throughout the day.
Transformer	A transformer monitors, increases and controls the voltage of the electricity produced.
Visual amenity	Whether an effect is direct, indirect, temporary or permanent, positive (beneficial), neutral or negative (adverse) or cumulative.

Term	Description
Visual effect	Value of a particular place in terms of what is seen by visual receptors taking account of all available views and the total visual experience.
Visual receptors	Effects on specific views and on the general visual amenity experienced by people.
Visualisation	Individuals and/or defined groups of people who have the potential to be affected by a proposal.
Wetness Class (WC)	The soil moisture regime defined in terms of the depth and duration of waterlogging in most years, ranging from I (freely draining) to VI (permanently waterlogged).
Wireframe or Wireline	Computer simulation, photomontage or other technique to illustrate the appearance of a development.
World Heritage Site	Sites of outstanding universal value.
Zone of Theoretical Visibility (ZTV)	Area within which a proposed development may have an influence or an effect on visual amenity.

Abbreviations

Acronym	Definition
AADT	Annual Average Daily Traffic
Ab	Absolute emissions
AC	Alternating Current
ADC	Areas of Distinctive Character
AGL	Above Ground Level
ALC	Agricultural Land Classification
AMS	Archaeological Mitigation Strategy
AOD	Above Ordnance Datum
AONB	Area of National Beauty
AP	Assessment Point
BAU	Business as usual
BCT	Bats Conservation Trust
Be	Baseline emissions

Acronym	Definition
BESS	Battery Energy Storage System
BFSMP	Battery Fire Safety Management Plan
BGS	British Geological Survey
BMV	Best and Most Versatile
BNG	Biodiversity Net Gain
BPM	Best Practicable Means
BSI	British Standards Institute
CA	Coal Authority
CAMS	Catchment Abstraction Management Strategies
CBDC	Cumbria Biological Data Centre
CC	Cumberland Council
CCC	Cumberland County Council
CCC&DO	Cumberland Council Conservation and Design Officer
CCGT	Combine Cycle Gas Turbine
CCS	Considerate Constructors Scheme
CCTV	Closed Circuit Television
CEA	Cumulative Effects Assessment
CEMP	Construction Environmental Management Plan
CFA	Continuous Flight Auger
CHES	Cumbria Historic Environment Service
CIEEM	Chartered Institute of Ecology and Environmental Management
CIRIA	Construction Industry and Research Information Association
ClfA	Chartered Institute of Archaeologists
CNP	Critical National Priority
CRTN	Calculation of Road Traffic Noise
CSWMP	Construction Surface Water Management Plan
CTMP	Construction Traffic Management Plan
CV	Calorific Value

Acronym	Definition
CWS	Country Wildlife Site
CWS	Conservation Wildlife Site
DAD	Design Approach Document
DBA	Desk-Based Assessment
DCO	Development Consent Order
DEFRA	Department of Environment Food and Rural Affairs
DEMP	Decommissioning Environmental Management Plan
DESNZ	Department of Energy Security and Net Zero
DLL	District Level Licence
DMRB	Design Manual for Roads and Bridges
DNO	Distribution Network Operator
DTM	Digital Terrain Model
DWSgZs	Drinking Water Safeguard Zones
EA	Environment Agency
ECOW	Ecological Clerk of Work
eDNA	environmental Deoxyribose Nucleic Acid
EHO	Environment Health Officer
EIA	Environmental Impact Assessment
EIB	European Investment Bank
EIP	Environmental Improvement Plan
ELC	European Landscape Convention
ENW	Electricity North West
EPA	Environmental Protection Act
ES	Environmental Statement
ESR	Environmental Sensitive Receptors
EU	European Union
FLL	Functionally Linked Land
FRA	Flood Risk Assessment
FTE	Full Time Equivalent

Acronym	Definition
FWMA	Flood and Water Management Act
GCN	Great crested newt
GHG	Greenhouse Gases
GIS	Geographic Information System
GMST	Global Mean Surface Temperature
GPS	Global Positioning System
GWDTE	Groundwater Dependent Terrestrial Ecosystems
HCA	Homes and Communities Agency
HDD	Horizontal Directional Drilling
HE	Historic England
HER	Historic Environment Record
HEWRAT	Highways England Water Risk Assessment Tool
HGV	Heavy Goods Vehicle
HM	His Majesty
HMMP	Habitat Management and Monitoring Plan
HRA	Habitat Regulations Assessment
HSI	Habitat Suitability Index
HSRA	Health and Safety Risk Assessment
HVAC	Heating, ventilation, and air conditioning
IACPC	Impact Assessment and Conservation Payment Certificate
ICCROM	International Centre for the Study of the Preservation and Restoration of Cultural Property
ICOMOS	International Council on Monuments and Sites
IEMA	Institute of Environmental Management and Assessment
ILE	Institute of Lighting Engineers
INNS	Invasive Non-Native Species
IPCC	Intergovernmental Panel on Climate Change
IUCN	International Union for Conservation of Nature
LCA	Landscape Character Area

Acronym	Definition
LCT	Landscape Character Type
LDNP	Lake District National Park
LDNPA	Lake District National Park Authority
LEMP	Landscape and Ecological Management Plan
LEP	Local Enterprise Partnership
LFRMS	Local Flood Risk Management Strategy
LiDAR	Light Detection and Ranging
LLFA	Lead Local Flood Authority
LNR	Local Nature Reserve
LOAEL	Lowest Observed Adverse Effect Level
LPA	Local Planning Authority
LRN	Local Road Network
LVIA	Landscape and Visual Impact Assessment
LWS	Local Wildlife Site
MAGIC	Multi-Agency Geographic Information for the Countryside
MSA	Mineral Safeguarding Areas
MW	MegaWatt
NCA	National Character Area
NERC	Natural Environmental Rural Communities Act
NHLE	National Heritage List for England
NNR	National Nature Reserve
NOAEL	No Observed Adverse Effect Level
NOEL	No Observed Effect Level
NPPF	National Planning Policy Framework
NPPG	National Planning Policy Guidance
NPS	National Policy Statement
NPSE	National Policy Statement for England
NSIP	Nationally Significant Infrastructure Project
NSN	National Site Network

Acronym	Definition
NTS	Non-technical Summary
NVC	National Vegetation Classification
ONS	Office for National Statistics
OS	Ordnance Survey
OUV	Outstanding Universal Value
PC	Principal Contractor
PCM	Pennine Coal Measures
PEIR	Preliminary Environmental Information Report
PINS	Planning Inspectorate
PIR	Passive Infra-Red
PMCM	Pennine Middle Coal Measures
PPG	Planning Practice Guidance
PPG	Pollution Prevention Guidance
PPV	Peak Particle Velocity
PRoW	Public Rights of Way
PUCM	Pennine Upper Coal Measures
PV	Photovoltaic
RAG	Red Amber Green
RBMP	River Basin Management Plans
RCP	Representative Concentration Pathways
RICS	Royal Institution of Chartered Surveyors
RPA	Root Protection Area
RSPB	Royal Society for Protection of Birds
SAC	Special Area of Conservation
SOAEL	Significant Observed Adverse Effect Level
SPA	Special Protection Area
SPD	Supplementary Planning Document
SQ	Special Qualities
SRN	Strategic Road Network

Acronym	Definition
SSSI	Site of Special Scientific Interest
SuDS	Sustainable Urban Drainage Systems
TCPA	Town and Country Planning Act
TWAO	Transport and Works Act Orders
UK	United Kingdom
UKCEH	UK Centre for Ecology and Hydrology
UNECE	United Nations Economic Commission Europe
UNESCO	United Nations Educational, Scientific and Cultural Organisation
UU	United Utilities
VP	Vantage Point
WDTE	Water Dependent Terrestrial Ecosystems
WER	Water Environment Regulations
WFD	Water Framework Directive
WHO	World Health Organisation
WHS	World Heritage Site
WLC	Whole Life Carbon
ZTV	Zones of Theoretical Visibility
